

## Math Course Progression Recommendations

We strongly recommend students only take one math course per year through AFM or Essentials for College Math.

To move from academic to honors, one must have a 95 or better and a teacher recommendation. To stay in honors, one must have a 77 or better.

Students must earn 4 math credits to meet the graduation requirement. Please note that meeting the graduation requirement does not necessarily mean the student has met the requirement to attend a UNC school. See below.

\*\*After completing this course, students have met the requirement for admission into the UNC System.
